TITLE: ON-VEHICLE DISPLAYAbstract (1):

PROBLEM TO BE SOLVED: To provide an on-vehicle display capable of clearly displaying a message which a driver wants to send to other vehicles.

Abstract (2):

SOLUTION: This on-vehicle display is mounted in a vehicular rear part or a vehicular front part for displaying a message. It is provided with a display part 10 displaying pictures or characters expressing the message, lighting parts 15 to 17 lighted for highlighting the pictures 13a, 11a, and 11b or the characters displayed by the display part, a blinking control part 18 alternately blinking plural portions 15 and 16 of the lighting parts 15 to 17 in accordance with the contents of the pictures 13a, 11a, and 11b or the characters of the display part 10, and a switch (not illustrated) for lighting the lighting parts 15 to 17 and operating the blinking control part 18. The lighting parts 15 to 17 are composed so that when the switch is turned on, the portion 17 excluding the plural parts 15 and 16 is lighted for a predetermined time and the plural portions 15 and 16 alternately blink in a predetermined cycle for the predetermined time.
